Problem Statement

01

Limited Accessibility in Tier 2/3 Cities

Apps ignore Tier 2/3 cities and their transport needs.

02

Language Barriers

Many users struggle with English-only apps.

03

No Accessibility Features

Disabled users face challenges with current apps.

04

Unsafe Travel for Pregnant Women

No features support their comfort or safety.

Our Solution

- Book local rides: Auto, Bike, Taxi

- Fare estimate with live traffic

- Pregnancy Mode for safe travel

- App in 8+ Indian languages

- Accessibility for differently-abled

- Travel & safety blog

- Rewards system for pregnant users

System Architecture

Requests transport booking

Sends request with user details and location

Stores user details and location data

Retrieves map and ETA data for routing

Frontend	Backend	Database	API
React Tailwind CSS	Express.Js	Mongo DB	Google Map Api

Future Scope

- Geographical & Language Expansion

- AI-Powered Smart Features

- Green Mobility & EV Integration

- Corporate & Subscription Plans

- Safety, Accessibility & Inclusivity

- New Revenue Channels & Logistics

Thank You
